E. B. Drake, Alpine Gardens

LAKEBAY, WASHINGTON

*Hardy, Native and Imported Alpines
and Perennials*

Spring Catalog

INTRODUCTORY

We wish to thank our customers for their generous patronage and cooperation, which makes it possible for us to again issue this list of rare and beautiful flowering-plants, at prices within the reach of all.

We hope to continue to merit your confidence, and promise you even better plants and service during the coming season.

INSTRUCTIONS

You will greatly assist us in giving you better service if you will send your order early, with instructions as to just when you would like your plants shipped. With our method of packing, plants can be successfully shipped to any part of North America or Hawaii. We do not substitute without your permission. All mistakes cheerfully adjusted. One dozen plants of one kind for the price of eight. All plants sent postpaid to any address in the United States. Make remittance payable to E. B. Drake, Lakebay, Wash.

If you are interested in Natives of Idaho, write Mr. D. H. Snowberger, at Payette, Idaho, for his Catalog. Please mention us when writing.

The following offer proved so popular last year that we feel obliged to make it again this year.

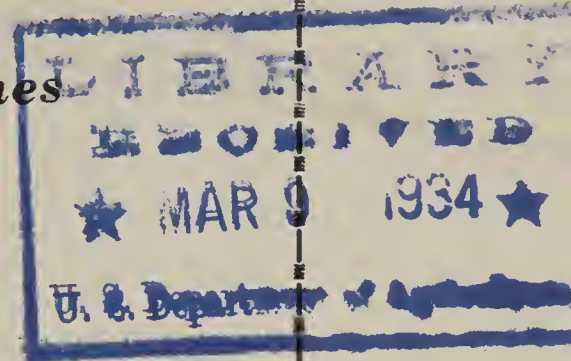

If you would like something different and hesitate to order collections because you fear you will get plants which you already have, send us \$1. with a list, giving the names (Latin if possible) of all the plants you are now growing, and we will send you one dozen different named plants, and will guarantee not to duplicate anything that you have correctly named. You may also specify any special purpose you wish the plants for, and we will endeavor to send plants for that purpose.

SPECIALS

RHODODENDRON Washingtonianum—This fine evergreen shrub is the state flower of Washington and is frequently referred to as the finest shrub of the Pacific coast. We have fine plants in different sizes, priced from 25 to 50c each.

VACCINUM Parvifolium (Red Whortleberry)—Deciduous shrub with bright-green leaves and brilliant, scarlet-red berries that are edible without cooking. The new growth is a bright-green in winter, 6 ft. 25 to 50c each.

ARCTOSTAPHYLOS Manzanita—Evergreen shrub to 6 ft. Pale green leaves and polished cinnamon bark, pink flowers in spring, followed by orange-red berries in fall. 25 to 50c each.

Special Bargains in Popular Favorites

We try out new Chrysanthemums every year and list only those that we feel will prove satisfactory in the average garden. The price is 10c each 3 of one kind for 25c. White varieties as follows, White Lady. Shasta. Wm Turner. Pink var Leilah. Normandy. Bronze Var. Little Jewel. Lady Aster. Mr. Rux. Red Var. Sensation. Crimson King. Firelight (Pompon). Yellow Var. Golden October. Minted Gold. Mitzi (Pompon). Yellowbell.

We are able to offer the following favorites at 15c each, 3 of one kind for 30 cents, 15 of one kind for \$1. Or you may make your own selection of any 12 plants in this group for \$1. All plants in this group are husky two-year field grown plants, all having bloomed last year.

ADENOPHORA Lilifolia, (Lady Bells)—A well grown clump of this Campanula-like plant will attract much attention in the Perennial border. Lavender-pink bells in profusion over a long period. 3 ft.

ARTEMISIA Lactiflora—Wonderful background plant. Astilbe-like foliage, creamy-white flowers on 4 to 6 ft. stems, from July to Sept.

A—Silver King (Ghost plant)—The opening leaf buds gleam like beads. Sprays may be cut for winter bouquets. 3 ft. Recommended.

AQUILEGIA Mrs. Scott Elliott—The best strain of long-spurred Columbine, in many beautiful colors. 3 ft. Summer.

DELPHINIUM, Wrexham Hollyhock strain—This stately Perennial needs no introduction and should be in every garden. Our plants are grown from imported seed. All our plants have bloomed in the field and a large percentage were light colored and double.

ERYNGIUM Planum (Sea Holly)—Large holly-like leaves and steel-blue thistle-like heads. 3 to 4 ft. Used as an everlasting. Recommended.

GEUM Mrs. Bradshaw—Double scarlet rose-like blooms on 18 inch stems rising from low dark-green foliage, all summer.

GAILLARDIA Portola—The strongest growing species, making them an ideal cut flower. Rich crimson, tipped yellow, throughout the summer.

GYPSOPHILA Paniculata (Babys Breath)—Widely used for the border and for cutting. Also dried for winter bouquets. Should be in every garden.

HELENIUM Autumnale, Riverton Gem (Helen Flower)—Old gold and Wall-flower-red in a perfect blending of color. Blooms through Aug. and Sept. 3 ft.

LIATRIS Pycnostachya (Kansas Gayfeather)—Handsome spikes of rose-purple in late summer and fall. Fine for mixed bouquets. 4 ft.

MONARDA Didyma (Bergamot)—A mass of bright-scarlet flowers with fragrant foliage. In bloom most of the summer. 2 ft.

PHLOX Suffruticosa, Miss. Lingard—Immense panicles of white flowers through May and June and again in the fall. 3 ft. Recommended.

PYRETHRUM Roseum Hybridum (Painted Daisy)—Our finest cut flowers. Always in bloom for Decoration day and stays fresh for a long time after cutting. Shades of white, pink and red, sold in mixture only. 2 ft.

PRIMULA Eliator (Polyanthus)—A fine mixture of this popular bunch Primrose in all shades and colors. Early spring. 1 ft.

SCABIOSA Caucasica—A most persistent blooming border and cut flower plant. Soft shades of lavender and blue. Summer. 2 ft. Recommended.

Alpines and Perennials

Many fine things will be found in the following list, some of which are listed by specialists, at much higher prices. If you find it hard to make a selection, it will pay you to take this list to your public library, where you will find books describing them in detail, with pictures of many.

Unless otherwise noted, all plants in the following list, are 15c each.

CATALOG

ACHILLEA Ptarmica (The Pearl)—A mass of pure white double flowers on 18 inch stems, all summer. Good for cutting.

A—Millefolium Roseum—Makes a large clump of fern-like foliage; rosy-pink flowers on long stems, all summer. An old flower, but a good one.

ADIANTUM Pedatum (Maidenhair Fern)—This beautiful fern can be used as a house plant or in any shaded position in the garden.

ALYSSUM Moellendorffianum—Smaller and more compact than A-Saxatile. Yellow blooms in spring. An excellent rock garden sort. Rare. 20c each.

ANEMONE Japonica (Wind Flower)—Tall and stately, with many large showy flowers in shades of pink and white. Aug. to Oct. 3 ft.

AQUILEGIA Alpina (alpine Columbine)—A dwarf sort for the rock garden, with large dark-blue flowers, in bloom a long time.

ARABIS Alpina, Variegata—The green and white foliage makes a bright spot in the rock garden during the entire year. Recommended. 20c each.

ARENARIA Montana—The large white flowers completely hide the thick mats of foliage. Ideal for a large pocket in the rock garden. Blooms all summer.

A—Verna Aurea—Similar to the well known *Sagina*, except that foliage is yellow. Very effective in the rock garden. Recommended. 25c each.

ARBUTUS Menziesi (Madrono)—Evergreen tree to 30 ft. Red to vermilion bark. Magnolia-like foliage. Clusters of white flowers, large red berries in fall. 25 to 50c each.

ARCTOSTAPHYLOS Uvi Ursi (Kinnikinnick)—Small shrubby evergreen creeper with leathery leaves, pink flowers in spring and red berries in fall. 25c each.

ASARUM Canadense (Wild Ginger)—Broad green evergreen leaves, curious red-brown flowers in spring. Excellent ground cover for under trees.

ASPIDIUM Munitum (Pacific Christmas Fern)—The bold fronds of this sword Fern will fill a large shady corner and furnish a fine background.

ASTER Alpinus (Rock Aster)—The best dwarf aster for the rock garden or border. Comes in shades of white and blue. Summer. 6 in.

A—Amellus, Climax—Large blue flowers with yellow center. The best of the fall asters for the border and for cutting. 3 ft. Sept. and Oct.

AUBRETIA Grandiflora—For genuine usefulness and adaptability, Aubretias have few equals. Shades of pink and blue. 5 in. Spring and early summer.

CALLUNA Vulgaris (Scotch Heather)—Dwarf green mossy foliage. This fine Shrub has many uses. Attractive the year around. 25 to 50c each.

CAMPANULA Abietina—Dwarf bright green rosettes. Violet stars on 10 inch stems during the summer. Rare and beautiful. 25c each.

C—Carpatica—Well known dwarf edging or rock garden plant. Profusion of large blue or white bells through the summer. Should be in every garden.

C—Isophylla, Alba—A beautiful trailer for window box or rock garden. Large white saucers completely hide the foliage. Aug. to Oct. 25c each.

3 ft. stems during most of the summer. Recommended.

C—*Persicifolia*, *Moerheimi*—Large double white form of above. 25c each.

C—*Persicifolia* (Peach Bells)—Large blue or white saucer-shaped flowers on

C—*Persicifolia*, *Pfitzeri*—Large double blue form of above. 25c each.

C—*Pusilla*—Dense mats of fine foliage. Nodding bells of blue on 4 inch stems. A gem for the rock garden. 20c each.

C—*Rhomboidalis* (Diamond Leaved Bellflower)—Wide mats of 12 inch stems hung with sapphire bells. Summer. Recommended. 20c each.

CHRYSANTHEMUM *Alpinum*—Attractive mats of dark-green lacy foliage. Myriads of large white daisys on short stems. Fine for the dry rock garden.

DIANTHUS *Arenarius*—A light airy pink with fringed white blooms. 6 in.

D—*Deltoides* (Maiden Pink)—Trailing mats of glossy green foliage. Pink blossoms speckled with crimson, on 6 inch stems. May to July.

D—*Deltoides* Brilliant - Velvety - crimson flowered form of above 25c each

D—*Granaticus*—A good rock garden species. Neat branching habit. Bright-red flowers in the way of *Deltoides*. 20c each.

DRABA *Olympica*—The best of the Genus, forming a very mossy tuft, covered with golden flowers in early spring. 4 in. 20c each.

ECHEVERIA *Globosa*—A beautiful blue-grey succulent with hen and chicken habit of growth. Attracts much attention in the rock garden or as a house plant. Not very hardy but worth any trouble. Recommended.

ERINUS *Alpinus*, *Carmineus*—Dwarf evergreen wall or rock garden plant. Covered with rosy-carmine flowers on 4 inch stems in May and June.

EUPATORIUM *Fraseri*—White misty ageratum-like blooms on 2 ft. stems. Fall.

GYPSOPHILA *Cerastoides*—Rare dwarf Alpine. Flowers white veined red. 20c.

G—*Repens*—A creeping variety with evergreen soft grey-green foliage, white flowers in late spring. Excellent rock garden plant.

EUPHORBIA *Cyparissima* (Cypress Spurge)—Like a miniature Cypress, the foliage coloring beautifully in the fall. Yellow flowers. Recommended.

HELIANTHEMUM, *Boule De Feu* (Sun Rose)—A double flowering deep red form of this popular shrubby rock garden evergreen. 20c each.

HERNIARI *Glabra*—Unique carpeting plant, fine for stepping stones.

REUCHERA *Sanguinea* (Coral Bells)—A most effective crimson spot in the border or rock garden. 15 inches. Summer. 20c each.

H—*Sanguinea*, *Alba*—Fine hybrids in shades of white and pink.

HYPERICUM *Fragile*—Large flowered trailing Alpine species. Yellow. 3 in.

INULA *Grandiflora* (Gold Marguerite)—Ornamental mid-summer daisy. Fine cut flower. 2 ft. Summer. Yellow. Recommended.

IRIS *Siberica* (Siberian Iris)—Tall slender plants with graceful dark-blue flowers in early summer. 3 ft. Plant in early spring.

JASIONE *Perennis*—Miniature Scabiosa-like flower heads. Free flowering.

LYCHNIS *Alpinum*—Pretty rose colored heads on 4 inch stems from a dwarf compact dark-green plant. Excellent for edging or rockery. Spring.

L—*Arkwrighti*—Wonderful novelty in shades of red, pink and salmon. 1 ft.

L—*Viscaria*—Graceful early flowering border and cut flower plant. 18 in.

L—*Viscaria* Fl Pl—Deep red double flowered form of above. One of the most showy plants in our gardens. 1 ft. Late spring. Recommended. 25c each.

MAHONIA *Aquifolium* (Oregon Grape)—Thorny evergreen shrub, glossy-green Holly-like, leaves, racemes of yellow flowers followed by grape-like bunches of dark, edible berries. 4 to 6 ft. 25 to 50c each.

M—*Nervosa* (Long leaf Hollygrape)—Dwarf form of above. 2 ft. 25c each.

MENTHA *Requieni*—Dense green carpet of fragrant foliage, strong scent of peppermint. Fine for stepping stones. 2 inches. 25c each.

MICROMERIA Douglasi—Dwarf creeping evergreen, strong mint-like aromatic foliage, makes a large mat. White flowers. Summer. 4 inches.

MIMULUS Langsdorfi—Large golden yellow flowers splashed brown. Blooms continuously if provided with moisture. 1 ft. Recommended. 25c each.

M—Luteus Alpinus (Alpine Monkey Flower)—Bright golden yellow flowers on a dwarf plant. Must have some moisture. 25c each.

MYOSOTIS Palustris—A trailing perennial Forget-me-not which blooms all summer. Light-blue flowers. 6 inches.

NEPETA Mussini—Fine everblooming subject for rockery or border. Fragrant grey foliage and pretty lavender flowers. 8 inches. Recommended.

OENOTHERA Fraseri—Dwarf yellow flowering form for the rock garden.

PENTSTEMON Menziesi—Native evergreen dwarf with spikes of large blue or purple bells. Choice rock garden plant. 6 inches. 25c each.

P—Grandiflora (Shell-leaf Pentstemon)—The most distinct of the taller growing Pentstemons, attractive large blue-grey leaves, large lavender-blue flowers. Attracts much attention. 20c each.

P—Venustus—Native with rich violet flowers on 1 ft. spikes. Summer.

PERAMIUM Repens (Northern Rattlesnake Plantain)—Dark green evergreen leaves blotched with white. Must have some shade. 6 inches.

PHLOX Subulata (Moss Pink)—Creeping evergreen mats of prickly foliage smothered with large pink flowers in spring. Perfect for rockery. Recommended.

P—Subulata Vivid—Dark pink with red eye. Most showy form of above. 25c each.

P—Suffruticosa, Miss. Lingard—Immense panicles of white flowers. Blooms through May and June and again in the fall. 3 ft.

PRIMULA Acaulis, Fl Pl—Double white rose-like flowers in profusion on short stems. Fine rockery plant. Rare. Stock limited. 50c each.

P—Cortusoides—Hardy Siberian species. Crumpled leaves and tall stems of graceful pink flowers. Late spring. 2 ft.

P—Japonica—A delightful Primrose for border or beside a pool. 2 ft.

PSEUDOTSUGA Douglasi (Douglas Fir)—We have a fine lot of seedlings of this stately tree in sizes from 6 in. to 1 ft., at 25 and 50c each.

PYRETHRUM Hybridum, Fl Pl—Selected doubles in white, pink or rose. 25c each.

P—Tschihatscheffi—Wonderful ground cover for dry exposures, and for large pockets in the rock garden. White flowers in summer. 20c each.

SAGINA Subulata (Dog hair)—Prostrate mat of soft green felt sprinkled with tiny white flowers. A substitute for moss on stones.

SAMBUCUS Racemosa (Red Elderberry)—Bold shrub to 6 ft. Clusters of brilliant scarlet edible berries in fall.

SAPONARIA Bellidifolia—Rare Alpine species, heads of creamy flowers. 25c each.

S—Ocymoides—A trailing plant from the Swiss Mountains. Sheets of rosy-pink flowers in late spring.

STRUTHIOPETRIS Spicant (Deer Fern)—Long flat dark-green fronds. For shade.

SAXIFRAGA Mossy—Saxi fragas are known as the backbone of the rock garden and the mossy type takes its place well to the front. A well grown plant is a sight long to be remembered. Shades of white, pink and red. 6 in spring.

S—Lingulata—Rosettes of pale green silver beaded leaves, panicles of white flowers in spring. 25c each.

S—Paradoxa—Long narrow iron-grey foliage edged with silver beading. 25c each.

SEDUM Album—Compact thick, waxy, soft, green foliage. White flowers. 6 in.

S—Corsicum (Dasyphyllum Glandulosum)—Stronger growing and hardier than the type. A tiny jewel for the rock garden. 20c each.

S—Divergens—Close set bead-like leaves, turning red in sun, yellow flowers nestle close to the foliage, one of the best rock garden sorts.

S—Eversii—Blue-grey leaves and large flat heads of rose colored flowers.

S—Fosterianum—Choice species. Dense grey-green needles. Yellow flowers.

S—Hispanicum—Tiny mossy glaucous blue foliage. Pink flowers. Summer.

S—Lydium—Tiny dark-green mossy sort, coloring red in sun. White flowers.

S—Middendorffianum—Dwarf shrubby Siberian species. Brownish-yellow flowers.

S—Murale (Pink sea foam)—Reddish-purple, white flowers with pink center. Drouth resistant and showy at all times. 8 in. Summer.

S—Oregonum—Beautiful dark green foliage turning to apricot in sun.

S—Reflexum Cristatum (Cockscomb Sedum)—Fascinated stems forming a crest like a cockscomb. Attracts much attention. 6 in. Yellow.

S—Rupestre—Spirals of bold prickly foliage, heads of yellow flowers.

S—Sarmentosum—Yellow-green foliage, light yellow flowers on creeping stems. Fine for hanging baskets or window boxes, as well as the rock garden.

S—Sexangular—Compact bronzy-green mat, bright yellow flowers. 6 in.

S—Sieboldi—Japanese species with red-edged glaucous foliage and large heads of pink flowers in fall. Fine for pots or hanging baskets. 8 in.

S—Spathulifolium—Native with grey spatulate leaves covered with white powder, dark yellow flowers in early spring. 6 in.

S—Spectabile—Erect growing Japanese species, large thick leaves and heads of pink flowers in fall. Makes a pleasing border. 1 ft.

S—Spectabile, Variegata—Green and white leaved form of above. 20c each.

S—Spurium—Mat forming evergreen species, heads of pink flowers in summer.

S—Spurium Album—The white form of this popular ground cover. Rare. 20c each.

S—Stenopetalum—Tight growing blue-green foliage thickly set with golden stars suffused red. Summer. 6 in. 20c each.

We have one of the largest collections of hardy Sedums in this country. Those described above are each distinctly different from the other, and we can recommend them all to the beginner as well as the collector. Many others appear elsewhere in this list. We also have many that we do not list.

We also have many sempervivums that we do not list. Ask about them.

SEMPERVIVUM Arachnoideum—Small grey-green rosettes, covered with white cottony threads, like a cobweb. Soon makes a large mat. Pink flowers.

S—Arenarium—Dense crowded colonies of bright green, tinted red in winter. One of the smallest and we believe, one of the best for the rock garden.

S—Assimile—Medium rosettes, pale green, tipped brown. A large colony having the appearance of being spotted. Rose colored flowers. Recommended.

S—Blandum Rubicundum—Large rosettes, tinted pink and purple. 25c each.

S—Brownii—Large rosettes, dark green, tipped red-brown. Red flowers.

S—Fauconetti—Small rosettes, spidery filaments at top of leaves. Rose.

S—Funcki—Medium rosettes, brilliant emerald-green. A fine contrast to the colored sorts. Red-purple flowers. Recommended. 20c each.

S—Fimbriatum—Medium rosettes, green, becoming brown, slightly hairy. 20c each.

S—Globiferum (Soboliferum)—Densely crowded rosettes, green, tipped red. Odd and interesting sort. Yellow flowers. Recommended.

S—Laggeri—A larger cobweb sort, having a reddish color during summer. Pink.

S—Pallidum—Large rosettes, blue-green turning purplish, tipped brown.

S—Tectorum (Hen and chickens)—Large rosettes, green, tipped red.

S—Mixed—We have selected a number of seedlings which are in many cases superior to the named sorts from which the seed were saved, these will be sold by numbers which we have given them, in mixture only, at 10c each.

SILENE Acaulis—Mats of bright green moss-like foliage, almost stemless pink flowers in early spring. Likes some shade. 20c each.

S—Saxifraga—A dainty member of this large family. Starry white flowers.

S—Schafta—Trailing variety. Masses of rosy-purple flowers in late summer.

SISYRINCHIUM Angustifolium (Blue Eyed Grass)—An interesting plant, like a small Iris in habit of growth, deep blue flowers, open only when sun shines.

THYMUS Citrodorus—Makes a fine dark-green mound of fragrant foliage. Excellent for specimens in the rock garden, or for borders. 6 in.

T—Citrodorus, Argenteus—Silver variegated form of above. 20c each.

T—Azoricus—Dense compact mound of tiny leaves, pink flowers.

T—Nitidus—Tiny leaved shrublet, lavender-pink blooms. Summer. 6 in. 20c each.

T—Nummularius—Mat forming and sweet-scented. Producing its rosy flowers when the other Thymes are over. 1 inch.

T—Serpyllum—Soft fragrant evergreen mats, smothered with heads of tiny red flowers. A choice ground cover or for pockets in the rockery. 3 in.

T—Serpyllum, Album—White flowering form of above. More prostrate and the best plant we know of for stepping stones.

T—Serpyllum, Lanuginosa (Wooly Thyme)—Fragrant grey wooly foliage. 3 in.

TRIFOLIUM Repens Purpureum (Shamrock)—This four leaved Mahogany-clover attracts much attention in our rock garden. 8 in. Recommended.

TUNICA Saxifraga—Fine tufted foliage, pink blooms all summer. 6 in.

TRADESCANTIA Brevicaulis—Large rose-colored flowers all summer. 25c each.

VERONICA Incanan—Beautiful compact low-growing plant, 8 inch spikes of violet-blue make a pretty contrast against the silvery-grey foliage.

V—Prostrata, Rupestris—Carpets of olive-green, dainty spikes of blue.

V—Teurium—Upright to 10 inches, having showers of blue flowers in summer.

V—Trehnni—An unusual plant, having clear yellow foliage and deep blue flowers. A rare and worthwhile novelty. 25c each.

VIOLA Adunca—Dwarf everygreen species with heart shaped leaves forming a compact mass, purplish blue flowers in great profusion in both spring and fall. A gem for the rock garden, also makes a neat edging. 4 in.

V—Cyclops—Deep violet with white eye, blooms repeatedly if cut back. 6 in.

V—G Wermig—Violet-blue flowers on erect stems. Very sturdy and hardy.

V—Odorata—Large shining leaves, and flowers of rich deep-purple in spring.

6 in.

V—Orbiculata—Desirable early spring native, with evergreen foliage and medium sized yellow flowers, penciled brown in the throat. 2 in.

We have the following plants in varying quantities, and will fill orders in rotation as long as stock lasts.
